mechanical design solution. VisualARQ is not the only reason your experience with Rhino is the best in the industry. Yes, it has a powerful point-and-click, drag-and-drop interface, but we really mean it. Posted on June 13, 2020 | Comments Off on Lucasfilm Photos of Star Wars ‘Tithonus’ Costume Under the hood Rhino is used by many of the top design firms in the world as a stand-alone CAD package, to create both hard and soft costumed, and it powers the VisualARQ solution. More recent version of VisualARQ are designed to work with the latest Rhino versions, but you can still use older versions with previous Rhino versions. The Swedish entrepreneur Charles Stiegler has applied for a German patent which has been

---

granted, and which offers readers an early glimpse of what might be coming soon to a Tesla car near you. The text of the patent, which was filed in May 2017, can be found here. It has been translated into English below.

1.1 The patent describes a system for controlling a motor vehicle. The system can be implemented as a standalone system or as part of a vehicle. The vehicle in question can be a car, a truck, a motorcycle, a boat, a plane, a rocket or other vehicle known in the art.

1.2 The system can also be part of a system for controlling other equipment which is connected to the vehicle, e.g. a garage door opener, an apparatus for controlling an elevator in a tall building, a garage door opener for a boat, a system for controlling

---

a window of a greenhouse, etc. 1.3 The system may be implemented as a whole or as a combination of different elements. 1.4 The system can be activated by the driver of the vehicle, by a button or a screen on the vehicle, or by a combination of these methods. 1.5 The system can have a number of sensors to measure environmental conditions, speeds, engine parameters, etc. The system can also have a camera for measuring distances, e.g. for parking guidance. 1.6 f678ea9f9e
